

New Revelations into Kibbutz

New disclosures continue to add to the growing body of evidence indicating many 'Israelis' who died on October 7 were killed by the 'Israeli' military. The 'Israeli' government continues to muzzle captives freed from Gaza to prevent further damage to the Jewish entity's official narrative. First hand testimony by inexperienced 'Israeli' tank operators reveals orders to open fire upon 'Israeli' communities when Palestinian fighters breached the fences encircling Gaza on October 7. A glowing profile of an all-female tank company by 'Israel's N12 News network contains admissions by the 20-year-old captain — identified only as 'Karni' — that she was ordered by a "panicked" soldier to open fire on homes in the Holit kibbutz whether they contained civilians or not. While the 'Israeli' government and its army of international propagandists have blamed Hamas alone for a range of grisly killings on October 7, along with unsubstantiated claims of rape, torture and beheading babies, the comments in N12's report add to a growing body of evidence demonstrating that shelling by 'Israeli' tanks was responsible for many of the casualties incurred in 'Israeli' kibbutzim. According to the soldiers interviewed, others killed by the tank company in question include supposed Palestinian militants whom they say they crushed to death with their vehicle.

Coup Attempt in Sierra Leone

Police and government officials in Sierra Leone labeled a coordinated series of attacks on military barracks and prisons on Nov. 26 as a failed coup attempt. According to Information Minister Chernor Bah, authorities have detained 13 military officers and one civilian in connection to the incidents. The attempted coup corresponds with growing discontent voiced by both the populace and opposition regarding the country's worsening economic and notably the significant surge in living costs. While the government initially attempted to minimize the events as a simple prison break, the coordinated large-scale escape by ex- and current military personnel starkly underscores a direct challenge to the existing government's control and stability. This could fuel additional societal turmoil, highlighting a substantial threat to the government. Authorities said at least 20 people were killed and nearly 2,000 inmates escaped during the Nov. 26 attacks on a military barracks, prison and other locations in the country.

China calls US 'Disruptor of Peace' After Warship Encounter in South China Sea

China called the US the "biggest disrupter of peace" in the South China Sea after a US warship sailed near Chinese-controlled islands in the disputed waters. The US Navy's Seventh Fleet said Saturday that the guided-missile destroyer USS Hopper sailed near the Paracel Islands, known as the Xisha Islands in China, in an operation known as a Freedom of Navigation Operation (FONOP). The US began regularly conducting FONOPs to challenge China's claims in the South China Sea in 2015. The area where the USS Hopper conducted the FONOP is also claimed by Taiwan and Vietnam. According to The South China Morning Post, the Chinese military said it "warned off" the US warship after it entered the Xisha Islands' territorial waters, which extend 12 nautical miles from a coastline. "The serious violation of China's sovereignty and security by the United States is further iron proof that it is pursuing 'navigation hegemony' and creating 'militarization of the South China Sea,'" China's People's Liberation Army's Southern Theater Command said in a statement. The US and its allies have been increasing their military activity in the South China Sea and other areas near China as part of the US-led military buildup in the region.
