## BACKGROUND OF EVENT

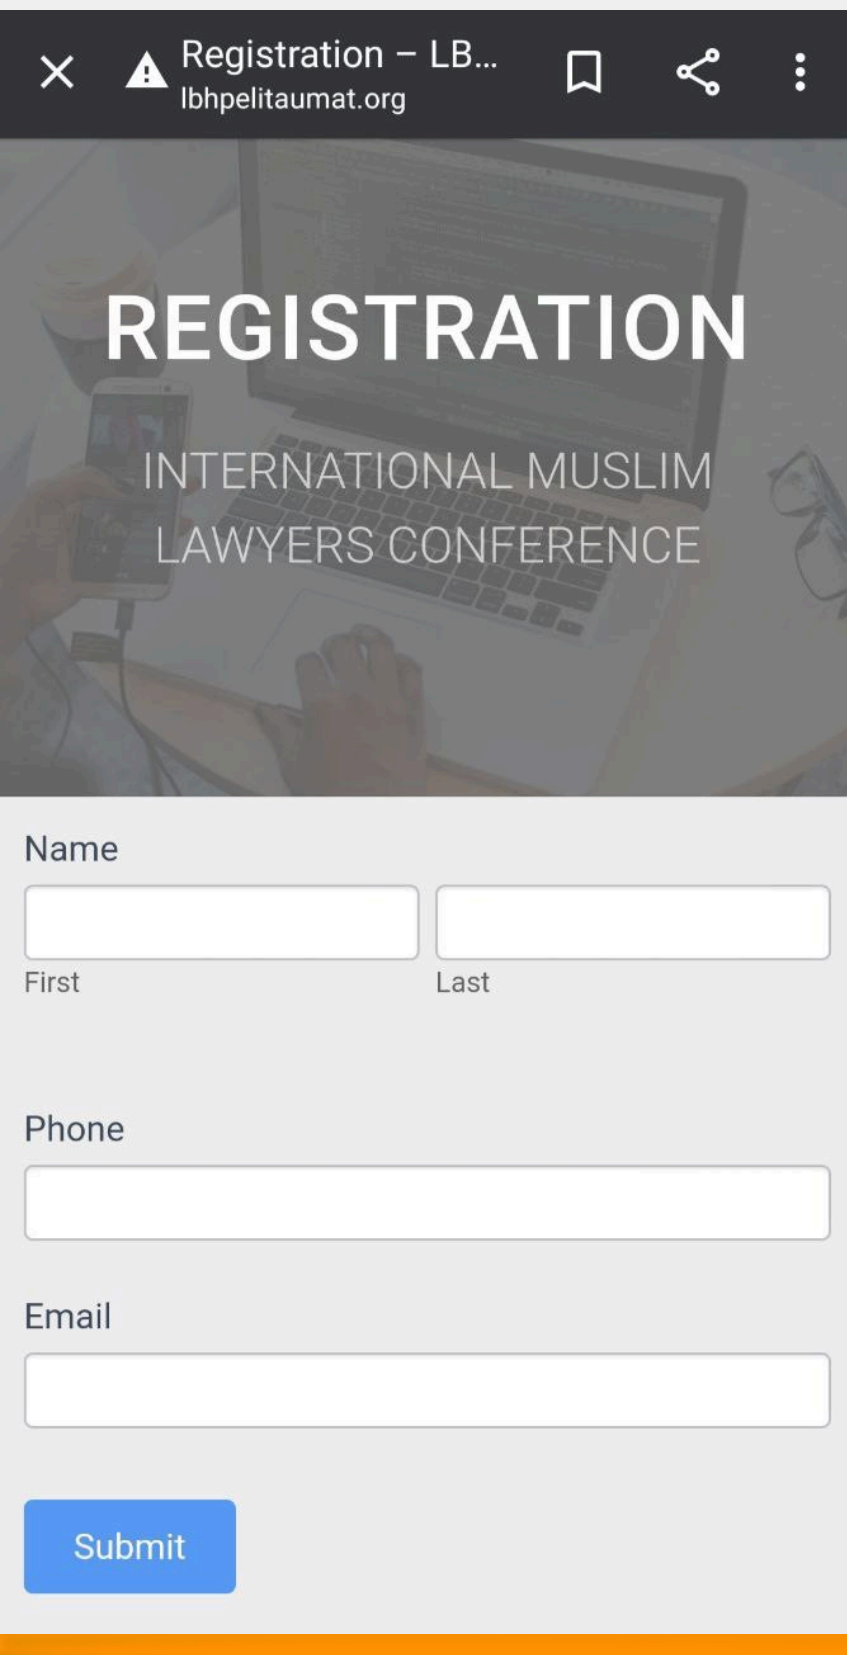

This agenda presents Lawyers and legal experts from various countries including Britain, the Netherlands, America, Malaysia and Indonesia. And will be witnessed from various countries.

This agenda is in order to find solutions to the problems faced by Muslims including rape, expulsion from their countries such as Rohingya, Syria, Palestine, perhaps millions of people live in refugee camps, systematic killings and occupations and accusations of terrorists that have implications for re-education camps happening in Uyghurs.

including the criminalization of Islamic teachings such as the Islamic Government System or the caliphate, even though on the one hand we are not prohibited from studying the government system and state form from Rome or such as republican, presidential, parliamentary, etc. Then also Islamic teachings related to the hijab, jihad is not free from monsterization and criminalization.

Then what is the view of international law, what solutions can be done in the context of law and how according to international law is it justified for Muslims to unite all their countries into one country.
