"Kabul Process" An Extension of the Failed Old Process

(Translated)

After a series of tragic blasts and heavy protests in Kabul on June 6th, we witnessed an international peace conference "Kabul Process" organized at Kabul. In addition to the United Nations, European Union, and NATO, 23 countries had participated. As always it ended without any specific outcomes.

Hizb ut Tahrir Wilayah Afghanistan considers the "Kabul Process" conference an American initiative against Moscow's efforts... It is the same as the other 40 different meetings and conferences without any considerable results. Similarly, this conference is another failed attempt that is only meant to deceive the public opinion. Indeed, the main cause of the conflict and turmoil in Afghanistan is the long term presence of the US and NATO forces and their long term colonial objectives in the region, which necessitates war rather than peace in Afghanistan. Moreover, the US and NATO are using Afghanistan as a military base for its war project in the region. Hence, even if the Taliban accepts the so called peace deal it will not have any significant impact in ending the brutal war... In order to keep the war machine going another alternative has already been launched in the form of ISIS, which is not part of the peace deal and process.

Afghan Mujahid nation should understand that the US, NATO and their puppet regimes are using such "peace" processes to give false hopes to you. In reality, they use the intensity of the combat, and the actions of the armed opposition for their own interest, and then forced them to drop their weapons, isolate them from the international affiliates and then coerce them to accept the US made secular constitution of Afghanistan. Anyone who would not accept these four American conditions will be considered as threat to the US interests, and would eventually be killed under the pretext of being "terrorists".
