**Hizb ut Tahrir calls upon the Aware Citizens and Influential People:**

## **Join in the Online Conference titled “Way Out - from the Clutches of Tyrant Hasina and Colonialist America” and Come Forward to Implement Guidelines**

The country's politics and economy are going through a crisis that has already turned into a major crisis. The sufferings of the people have reached extreme limits. Due to the increase in commodity prices the common people are struggling to buy even basic food like eggs and bread. In the dengue epidemic, everyone is passing their days in panic and fear with their families, relatives and children. There is no effective measure to kill mosquitoes, and there are no good treatment facilities. Business, the main source of bread and sustenance of the people, is going through a severe recession, while a few capitalists are building mountains of wealth. Mega-loot is going on in the name of mega project. The country's banks are being looted in a continuous process, and in the name of capacity charge, the festival of looting is going on in the power sector. The country's economy is facing bankruptcy due to the pressure of interest-principal foreign loan payment and reserve crisis.

When the people of the country are in such a worn-out situation, what is going on in the political arena? As you can see, high profile officials from Europe and America are visiting Bangladesh frequently. Awami-BNP groups are busy holding meetings and dinners with the officials of these colonialist countries. However, they claim that they do politics for the people. We do not see their least attention to solving any problem of the people, rather their focus is to stay in power or gain power by serving these Colonialists. By using this opportunity, the Colonialists are advancing with their agenda to achieve their economic and geopolitical interests. Although they use democracy, rule of law, and human rights to hide their heinous agendas and intentions, but you know and you have seen how they have destroyed countries like Iraq, Afghanistan and Pakistan in the name of these rosy words.

**O People**, at this critical stage of the country, this conference has been organized with the aim of highlighting the true reality of the country and presenting the guideline for the way out from this reality. We call upon to you to participate in the online conference titled **“Way Out - From the Clutches of Tyrant Hasina and Colonialist America”** to be broadcasted from Al Waqiyah TV and come forward to implement the way out.
