India Must Immediately Stop Making Threats to the People of Bangladesh

According to news reports on Friday, 9 August 2024, the Indian government has constituted a committee to monitor the current conditions along the Indo-Bangladesh border. It aims to ensure safety of Indian nationals and Hindus in Bangladesh. The committee will be headed by the additional director general of Indian Border Security Force's Eastern Command.

The government and the people of Bangladesh should send a clear message to India to immediately halt making these veiled threats whilst at the same time hosting the absconding tyrant Hasina on their soil.

We need to take all necessary steps to end US-British-Indian influence and interference in the country. We must also bring the Indian agent conspirators of the Pilkhana massacre to justice and establish a strong military that can protect the sovereignty and security of the country.
