

## Press Release

# **Meetings to Explain the Damage of "Religious Extremism" Began in Kyrgyzstan**

(Translated)

Experts and practitioners in the Jalalabad region of Kyrgyzstan have jointly conducted training activities for the local population to prevent "extremism and terrorism". The spokesman for the regional police said that these activities continue to warn of the danger of Hizb ut Tahrir, al-Akrami and the Inkariyoon Group (who have separated from the Tabligh group) and about their bad effects. Meetings are conducted in cultural houses and mosques. (Source <https://www.azattyk.org/>)

It should be noted that 21 parties are banned in Kyrgyzstan

The introduction of "moderate Islam" (traditional Islam) project into society has continued! The "Moderate Islam" project was built on the basis that national traditions are placed above Islamic values. National traditions have some indications of Kufr. "Moderate Islam" encourages Muslims to live in harmony with the community of Kufr and calls for active action to develop this society! For example, the number of people known to as religious scholars in Russia tried to prove the celebration of the New Year as a non-prohibited holiday.

"Moderate Islam" conducts scientific discussions and practical events to make the life of disbelief lawful. And those Muslims who have not agreed with or have not applied their ideas in their lives are termed "extremist or terrorist or radical!" They set decisions on this issue and are carrying out planned actions to increase the ranks of "moderate Islam" by intimidating and deceiving Muslims. "Moderate Islam" is a project of the disbelievers. Now all countries are taking it as a style for war against Islam and Muslims around the world. Islamic educational programs in Saudi Arabia and Egypt have been radically changed and transformed into moderation.

For several years, the Kyrgyz government has been carrying out actions on this issue at the level of government policy. This project, which has been forming for years, has become a factor in society. The problem is how does society accept that project? It is certain that scholars and imams will be attracted to it, because the Kuffar can only mislead Muslims through them; it is therefore expected that imams and scholars will be the main victims of this project. We call on them to firmly adhere to their religion and refrain from any cooperation with them. We ask Allah to make this test useful to them in this world and in the Hereafter.

O Believers, the disbelievers cannot break our religion without breaking our hearts and minds first. Also, in history, the Islamic State was in a state of distress after abandoning intellectual leadership and neglecting to build everything on the basis of Allah's satisfaction. In the end, our Deen has been removed from our lives.

"Moderate Islam" is a basic plan of the Kuffar which was set to mislead Muslims and divert them away from the Islamic ideology. The purpose of this is to prevent the Islamic revival; because the Islamic ideology, if it is excluded from our actions, our Deen will move away from our lives. And when we connect our lives with our creed, our Deen will return to our lives, with the permission of Allah, even if the disbelievers and the hypocrites detest!

Religion is protected by piety; because Allah's victory does not come to us according to our looks and shapes, but according to our actions which are based on piety and belief. Therefore, we must observe and hold accountable the opinion and position of our rulers and scholars at all times, because Kufr is dragging them to it! Some of them do not consider some of their words tend to disbelief or polytheism so they drowned in the swamp of treason for fear of disbelief. We must stand by our scholars and our imams and always encourage them and call upon them to fear Allah. Because this conflict is not between individuals but between the doctrine of Islam and the beliefs of Kufr. And disbelief intends to lead the scholars first and then Muslims through them through deception. If we do not maintain our solidarity, we will be defeated! Solidarity is not only bodily, but a union in the way of the Prophet (saw).

So, brothers and sisters, let us discard the Kuffar "moderate Islam" project! Because it leads us to the loss in this world and the Hereafter.
